Dear Dataconsulting.pl team,

I am writing to express my deep appreciation for the professional services that dataconsulting.pl has provided to our organization. Over the course of our collaboration, your expertise and diligent work have proven invaluable to the success of our migration project. The scope of the project included: AS-IS analysis, Cloud Migration Scenario definition, Target Architecture definition and Proof of Concept definition.

As we navigated the complexities of migrating from on-premises environments, including Oracle and Big Data, as well as AI/ML and Informatica, dataconsulting.pl's guidance was instrumental. Dataconsulting.pl demonstrated a deep understanding of customer needs to help us build a cloud-agnostic architecture, and their recommendations regarding modern cloud technologies such as Big Query and Snowflake were spot on.

In particular, I would like to mention the exceptional support provided by Rafal Stryjek. His expert advice on the configuration and use of Snowflake technology was crucial. Rafal's in-depth knowledge of migration issues, the use of Snowpark, and the intricacies of determining potential latency in real-time processing was impressive.

In addition, I would like to highlight the involvement of Przemysław Kantyka in addressing the challenges associated with migrating Oracle APEX to cloud technology using Snowflake in our target architecture. His deep technical insight and commitment to finding optimal solutions were instrumental in this critical part of our project.

Our project, carried out for a major client in the financial sector, required meticulous attention to detail and a deep understanding of both our client's needs and the latest technologies. Dataconsulting.pl met our expectations on all fronts, and the success of the project is a testament to the dedication and technical skills of your team.

We are grateful for your professionalism, commitment and the strong partnership we have built together. We look forward to continuing our relationship and achieving even greater success in the future.

Thank you again for your exceptional service.

Yours sincerely
Marek Młyniec
